PUBLIC NOTICE

7 October 2026

PUBLIC NOTICE: TRUCK CONGESTION AT KATIMA MULILO BORDER POST

NamRA has observed congestion involving trucks travelling from Namibia into Zambia through the Katima Mulilo Border Post.

Based on information currently available, the congestion is linked to a documentation requirement for entry into Zambia. Trucks are required to have a CE1 form and pre-alert documentation before proceeding to the Zambian customs control area. Trucks awaiting these documents may be required to remain on the Namibian side, contributing to congestion at the border post.

NamRA continues to process and clear trucks on the Namibian side. NamRA officials are engaging with the relevant Zambian authorities and other stakeholders to clarify the requirement and discuss measures to improve the flow of traffic. Further updates will be shared once those engagements have taken place.

To help avoid delays, transporters, clearing agents and exporters are encouraged to confirm that the required CE1 form and pre-alert documentation have been arranged before trucks proceed to the border.

NamRA further urges transporters and truck drivers to strictly adhere to road traffic rules relating to parking along the road as well as in the stretch between Namibia and Zambia. This is to ensure that free passage is maintained for trucks who are cleared to proceed to either country.

We apologise for the inconvenience and appreciate the public's patience and cooperation.

//END.
